This sacrifice is made to reduce stock, as we must have the room for our new stock of imported goods that begin to arrive in September.

A FEW QUESTIONS

Relative to the Construction of Storage Reservoir.

Editor Times: I would like to make a few inquiries in regard to article in the Barre Daily Times, is clay hard, pan? Not having the advantage of a four years' course in civil engineering in some college, my experience has been gained by the observation of deep cuts and the use of the pick and shovel.

Why was a contract let on a foundation fourteen (14) feet deep without sounding fourteen (14) through on the line of this dam? Has there ever been any sounding in the bed proper (say eight or ten feet deep) and clay been found? Or is there a bed of clay in the brook bottom on the line of the dam? Do we pay 60c a yard for excavating and is the contractor making from \$200 to \$300 two to three hundred dollars a day out of the city of Barre? Further, is this not in our line of work? How much do we average to pay for men and teams to go there and oversee this work each day? How many cubic yards of rock or stone was estimated in the bottom of this dam? Are we not at the mercy of the contractor for this extra expense at the bottom of this dam?

Have a few more questions, but will withhold them for the present. Do not wish to insinuate but that it is the proper thing to put in this reservoir, but the business end of it in my judgment is a disgrace to good business principles.

S. D. Allen.

Auto Went Over Bank.

A peculiar automobile accident occurred Sunday afternoon a short distance above East Montpelier, when a machine driven by a man named J. J. Ford, from New York City, ran over a low bank at the side of the road, and turned up on its side, throwing the occupants, three in number, out upon the ground. Fortunately, the entire party landed away from the car, and were not injured, but the mud wall was broken squarely off, this being the only damage done.

With the help of some fence rails, the machine was placed back upon its four wheels, and after temporary repairs to the gasoline tank, which has sprung a leak during the affair, the party proceeded on their way, none the worse apparently for their narrow escape from death or serious injury.

Montpelier and Barre join in a very strong petition to the Vermont public service commission to have it investigate the matter of telephone rates and the threatened increase in the same, in those cities. The gist of the petitioners' claims is that the proposed increase in rates is excessive; that it is unlawful for the telephone company to raise the rates; that the Vermont Telephone & Telegraph company's contracts with the New England Telephone company are void; that the New England Telephone & Telegraph company unduly absorbs the earnings of the subsidiary company. Montpelier and Barre are unquestionably entitled to relief and unless we are mistaken, the public service commission will see that they have it, without any injustice toward the telephone corporation.—Rutland News.
